ABOUT BRICKSTREAM®

Brickstream is a leading provider of behavior intelligence solutions for understanding human behavior in the places where people shop, gather, work and play. Brickstream's technology intelligently captures and analyzes data related to the actions of people as they enter, move through and exit an environment, delivering the equivalent of clickstream analytics for the brick-and-mortar world and surveillance to improve security. Premier retailers, grocery chains, hospitals, banks and others use Brickstream to understand more about their customers and visitors, and draw on the insight gained to enhance customer service, optimize resources, reduce loss, enhance security and maximize economic opportunities. Headquartered in Atlanta, Brickstream has the largest installed base of 3D analytics smart devices worldwide, a global network of partners, and regional offices in Europe and Asia.
