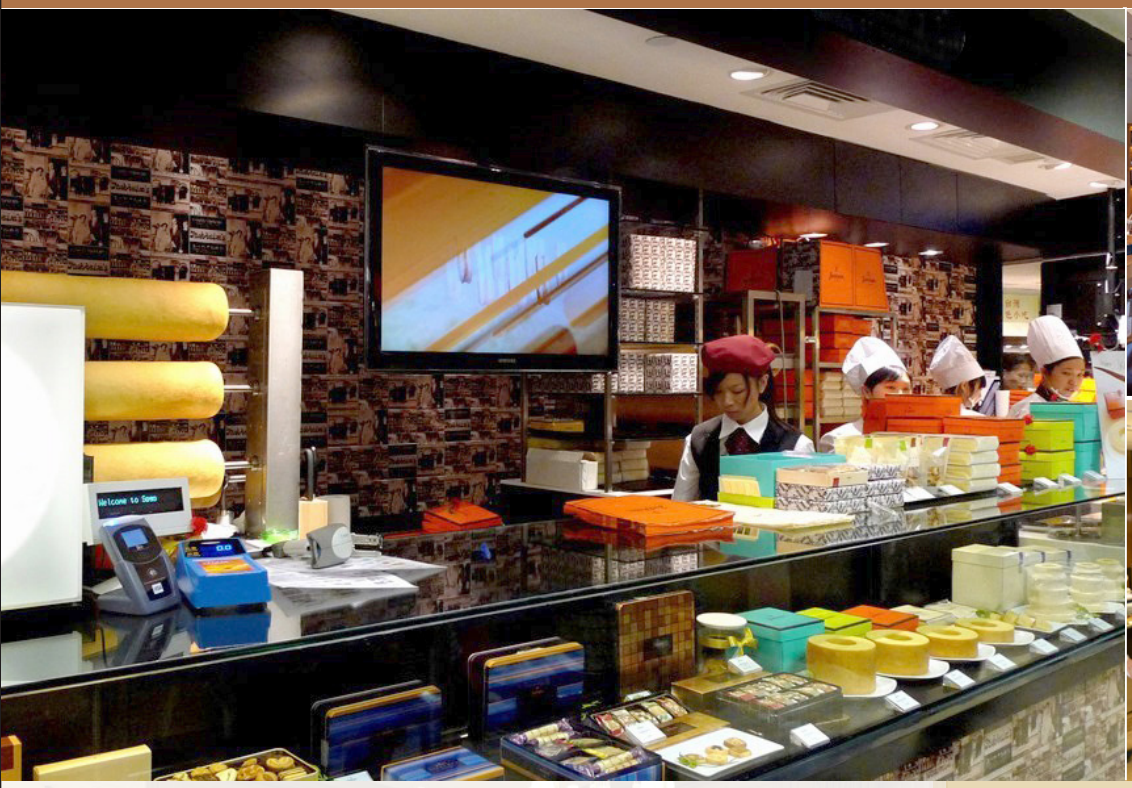
The Restaurant Digital Market Place



THE EATS365 PLATFORM

Eats365 is a cloud-based platform, built from the ground up to closely connect restaurants and patrons. It translforms a restaurant point-of-sales into a user-interactive system.

By adopting Eats365, patrons can find, browse, reserve, order and pay, no matter dining in or taking away. All the while, information is send in real-time to the restaurant electronically.

Also, the platform's flexible and modular design accommodates restaurants of all types and sizes; from quick serve to fine-dining, Eats365 revolutionizes dining experience like no other.
